

Homes catalogue and price tags for 2009 (TTC)

Some distinct strength of our Homes:

Modularity

Flexibility and possibility to customize the plans according your ideas/wishes

All homes fulfil state-of-the-art and French legal obligations (for example quake precautions and energy saving measures) and the projects are realised by an enterprise with an outstanding record for quality work.

All homes listed in this document reflect the regional architectural art and style considering the experience and knowledge gained whilst centennials of years (Temperature differences, sun exposure, rain and wind).

Important: New legislation in France for energy economy requires isolation measures adopted to the regional climatic conditions. This means that you must add 3% (TTC) to the published price on this page if your building project is located in Zone H.2 (Ardèche, Drôme or Vaucluse). The published price tag on this prospectus is valid for the Zone H.3 (Gard)!
